(a) One Grover iteration, repeated r times

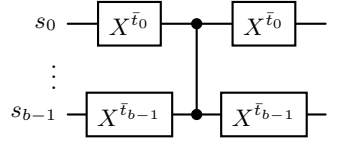

(b) Item k in the Fourier basis

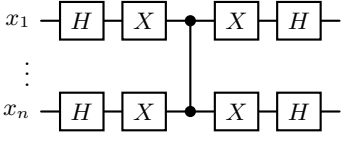

$\theta_j = 2\pi a_k / 2^{j+1}$; the offset ω is the same rotation, uncontrolled

(c) Oracle $O_{\tilde{t}}$

$\bar{t}_j = 1 - t_j$ for the bits of the encoded target $\tilde{t}$; a b-wide multi-controlled Z

(d) Diffuser D

an n-wide multi-controlled Z
